

COMBI

GROUND SUPPORT VEHICLE

DATA SHEET

Services

COMBI can offer a varied service including the rebuilding of your own equipment or supplying a totally rebuilt Aircraft Steps to suit your requirements. In many cases the customer can find this service extremely cost effective. The COMBI workshop is based 3 miles from Heathrow Airport and has refurbished many passenger steps and other Ground Support Equipment over the years.

Your Requirements

The customer requirements vary from the service of B737 to DC 10/10 Aircraft, and not to mention short lead times to acquire the equipment. COMBI in most cases can meet the needs by offering refurbished equipment and the customer has a better chance to work within the budget allocated to the project.

With the industry contracts changing to different suppliers much more frequently, the equipment may have to be paid off within a short period of time. The reduced cost of the COMBI steps and other aircraft equipment can prove to be very attractive.
