

# COMBI

## HC SERIES WEIGH SCALES

### Features

- High Accuracy
- Heavy Duty Design Up-to 10,000 kgs
- Standard and Custom Sizes
- Conveyor Aircraft Pallet Design
- ELI 800 Digital Display
- Printer Option
- Calibration & Certification
- Optional Large Display

### Description

The Combi HC SERIES of weigh scales are heavy duty scales designed for the Air Cargo Industry. Each scale utilises the unique "V-ball" load footprint, which allows the scale to absorb impact without damage. This also improves accuracy by reducing the effects of side load on the load sensors. Each scale is calibrated to a Cargo System 3 digital display with display resolutions of 1, 2, 5 and 10 kg's. The System 3 is also switchable between Kilo's and Lb's and has the option of running a printer. Please see separate data sheet for full details.

HC weigh scales are available in standard and custom sizes and can easily be installed into an existing cargo system including scissor lift.
